Budapest, Hungary | +36 20 628 9542

muhammadibrahimshoeb@gmail.com github.com/ibrahimify linkedin.com/in/ibrahimify ibrahimify.dev

EDUCATION

Budapest University of Technology and Economics

BSc in Computer Science and Engineering

Expected 2027

Budapest, Hungary

Aligarh Muslim University

Diploma in Computer Engineering

Aug 2017 – May 2020

Aligarh, India

WORK EXPERIENCE

Freelance

Full-Stack Developer

Apr 2026 – Present

Budapest, Hungary

- Designed, developed, and deployed **ARADI**, a production client platform using Next.js, TypeScript, React, PostgreSQL, and Supabase, with authentication, media management, inquiry workflows, and a custom content-management dashboard.

Milestone Institute

Mentor – Programming

Jan 2026 – Present

Budapest, Hungary

- Teach programming fundamentals to secondary-school students and mentor students pursuing university studies in computer science and related technical fields.

CrySyS Lab, BME

AI Security Research Assistant

Jan 2025 – Present

Budapest, Hungary

- Research privacy vulnerabilities in generative AI systems, implementing and evaluating membership inference attacks against diffusion models in Python under the supervision of Prof. Gergely Acs.

Wizz Air

Security and Central Services Trainee

Jan 2024 – Present

Budapest, Hungary

- Progressed from Evidence Collection Agent to Security and Central Services Trainee; deployed 10+ operational data products serving 50+ internal users using Python, SQL, Power BI/DAX, VBA, and ETL pipelines, reducing recurring data processing from 5 hours to 1 hour.

PROJECTS

MyHR – Employee Management System | *Python, PySide6, SQLAlchemy, SQLite*

Feb 2026

- Built a role-based HR application with access control, immutable audit logging, configurable business rules, CSV/XLSX validation, and a relational SQLAlchemy data model.

TeleGuard AI | *Python, scikit-learn, Docker, GitHub Actions*

May 2025

- Built a real-time ML bot using an ensemble classifier trained on 50K+ labeled messages (F1: 0.93); containerized with Docker and integrated CI/CD using GitHub Actions.

Elessar – Hospital Analytics Platform | *React, JavaScript, Vite*

Apr 2026

- Developed a React analytics platform with reusable components, KPI computation, interactive visualizations, and in-browser CSV ingestion and validation.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, C, C++, Bash

Frameworks & Libraries: React, Next.js, Node.js, SQLAlchemy, scikit-learn, PySide6

Tools & Platforms: Git, Docker, GitHub Actions, PostgreSQL, Linux, Power BI, Azure (basic), AWS (basic)

ACHIEVEMENTS

- 1st Place – “Most Sustainable Idea”, **EELISA Innovation Week Hackathon** (Madrid, 2024).
